

# LiveVoice

## Important information regarding our church translation system

We will gradually be changing our translation system here at church

In the near future we will stop using the existing physical translation equipment with Earphone and Receiver that you have picked up at the reception desk.

Instead, we will be using a web-based system called **LiveVoice**.

**You need to follow these steps in order to access translation:**

**One time only:** Download the LiveVoice app to your mobile phone either from Appstore or Google Play.

**Every time:** Have your mobile phone and your own earphones / airpods with you.

Go to the info desk, access the app on your phone and **scan the unique meeting QR code or digits** exclusively for today's unique meeting.

You are now setup and ready to receive your translation.
